

# iSOLATOR

## STALLS & GATES

### iSOLATOR

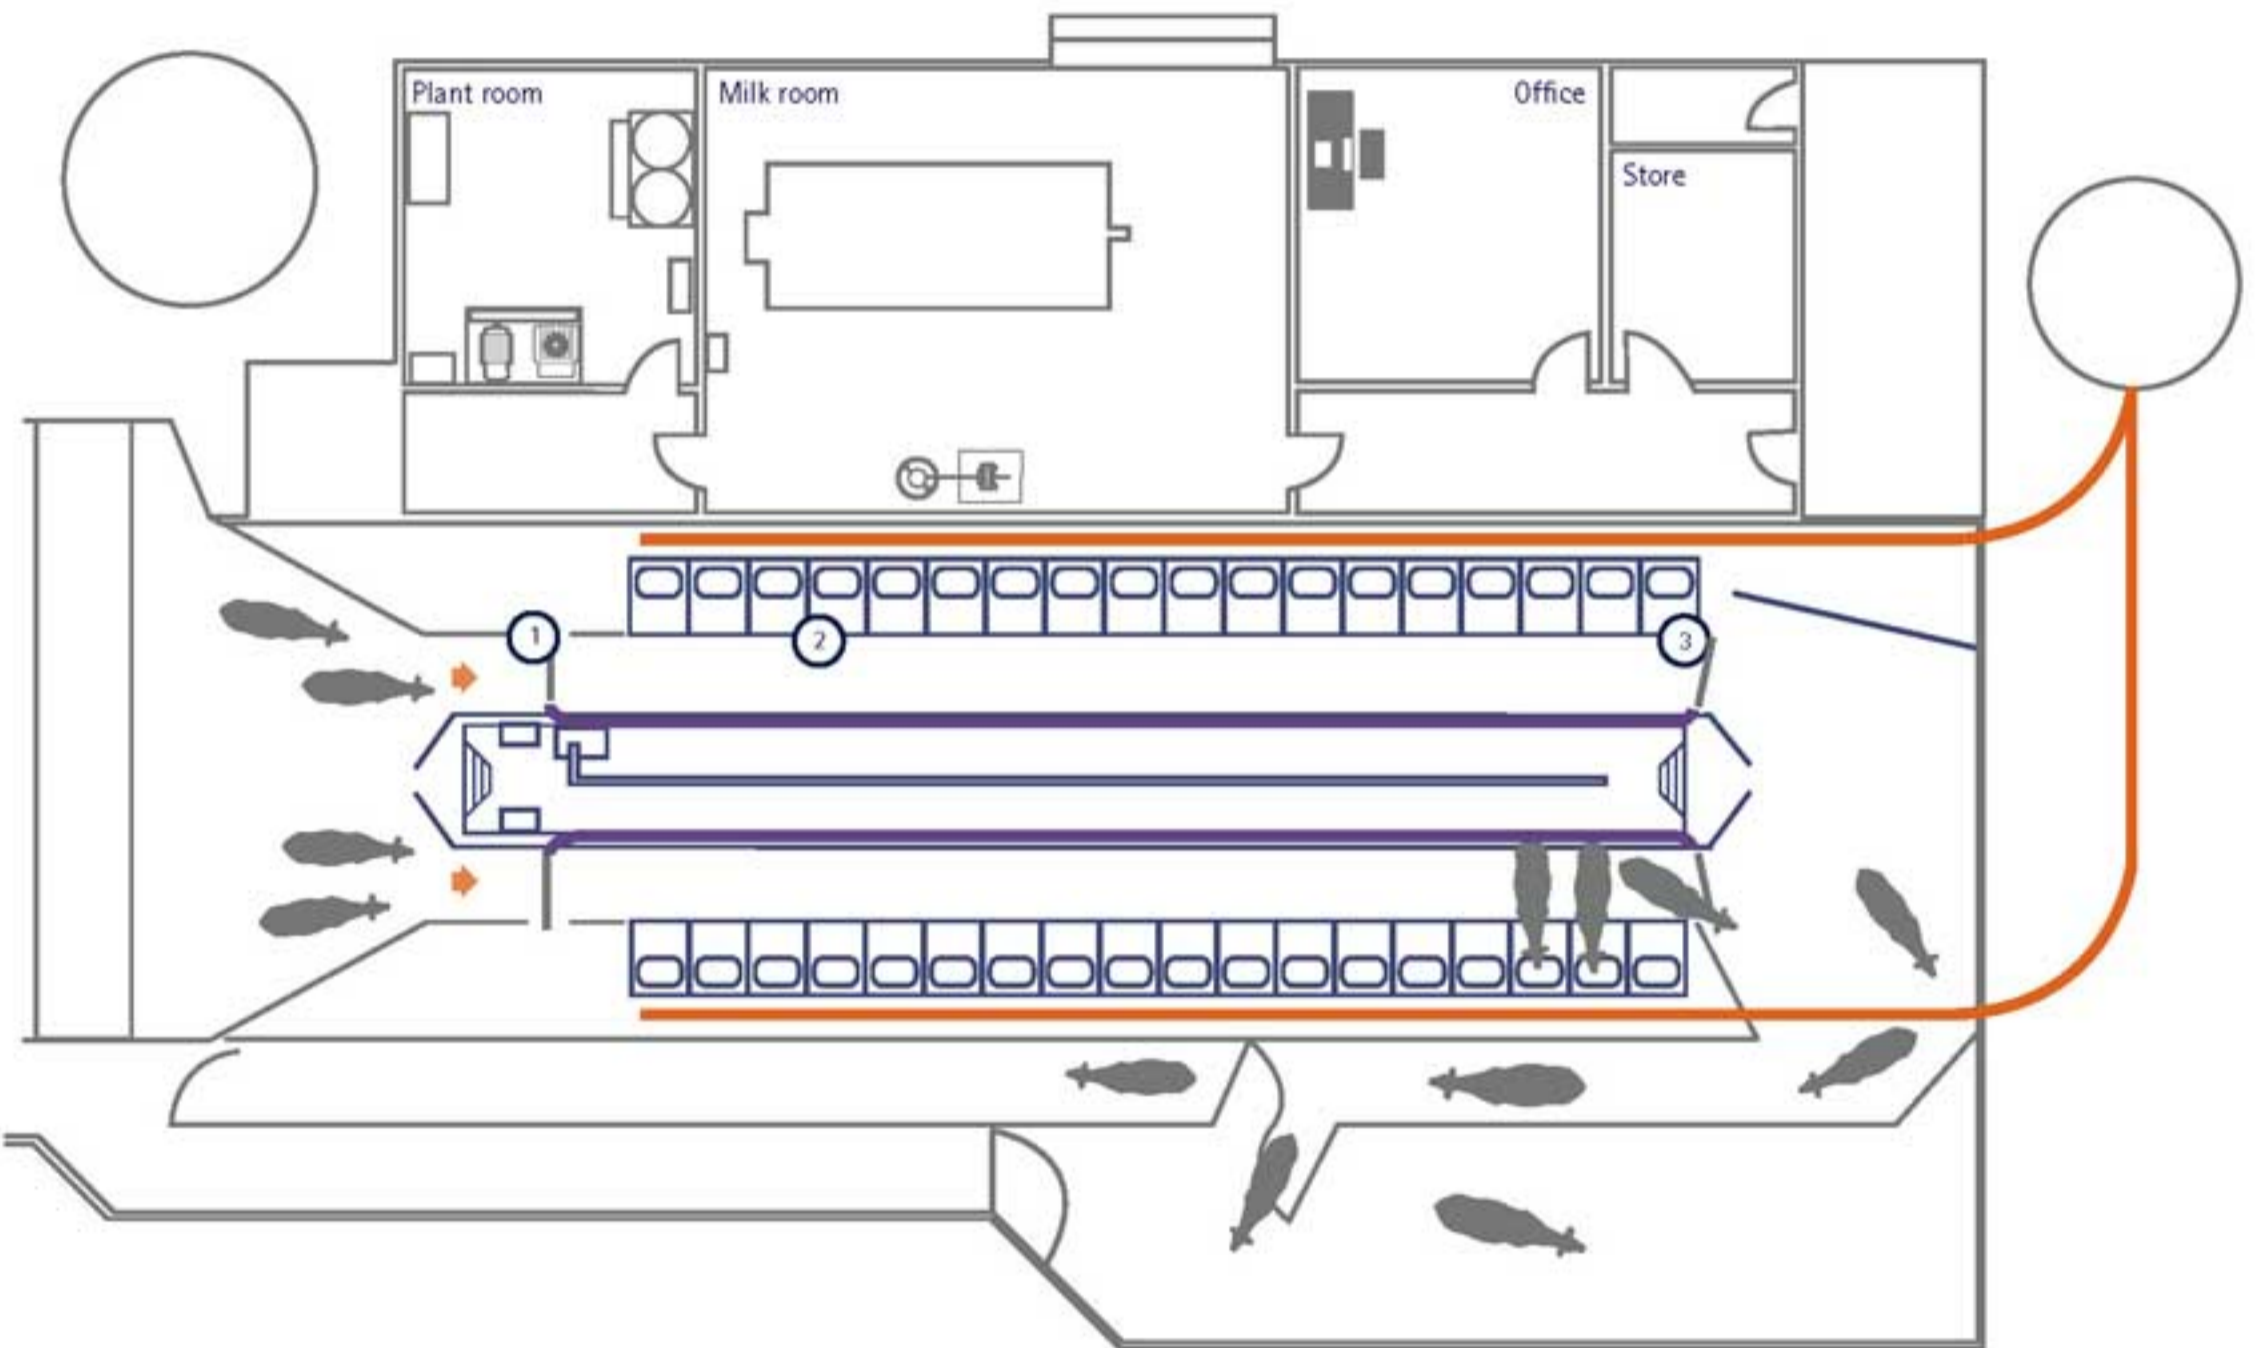

iSOLATOR stalls and gates are focused on three key aspects of your dairy operation; milking efficiency, cow alignment and in parlour feeding. They are designed to correctly index cows as they load the parlour maintaining efficiency and cow alignment for cluster attachment. Each cow has its own space and feed bin separating the cows so the feed ration cannot be robbed by a neighbouring cow.

	NUMBER OF CLUSTERS	6-60
	FARMING OPERATION	Partial Mixed Ration, Total Mixed Ration
	LEVEL OF INVESTMENT	
	MILKING SYSTEM SUITABILITY	iXPRESS4, iXPRESSIA, iXPRESSTWIN, iDUO
