

MILKING POINT HARDWARE

DATA TERMINAL

- User friendly interface located at cups on or cups off on rotaries or in the pit area in herringbone dairies
- Multiple interfaces can be installed
- Quick keys for entering data and requesting cow information
- Graphical, easy to read display
- Keeps the operator in touch with cow information when they need it

INTELSCAN KEY TECHNOLOGIES

INTELSCAN PLUS + INTELSCAN PRO

- Large 4 digit display indicates the operating mode and milk yield information
- Fully integrated automatic cluster removal
- Alphanumeric alerts for low milk, kick off and many other text alerts when connected to iDATAFLOW like antibiotics, treatments, drafting and cows due for drying off
- On screen display of milk yield information including total yield, actual flow rate, peak flow, average flow and milking time
- More than 50 adjustable parameters, timers and smart automation options
- Full upgrade path to herd management with iDATAFLOW or connection to external operating systems

INTELSCAN PLUS SENSOR TECHNOLOGY

- Based on Milfos unique (Infrared) Free Flow Technology offering reliable and accurate milk yield sensing
- No moving parts
- No maintenance required
- Detection of mastitis using conductivity technology
