

## MILKING POINT MANAGEMENT LEVEL 4

# iNTELSKAN PLUS with ACR & Pulsation

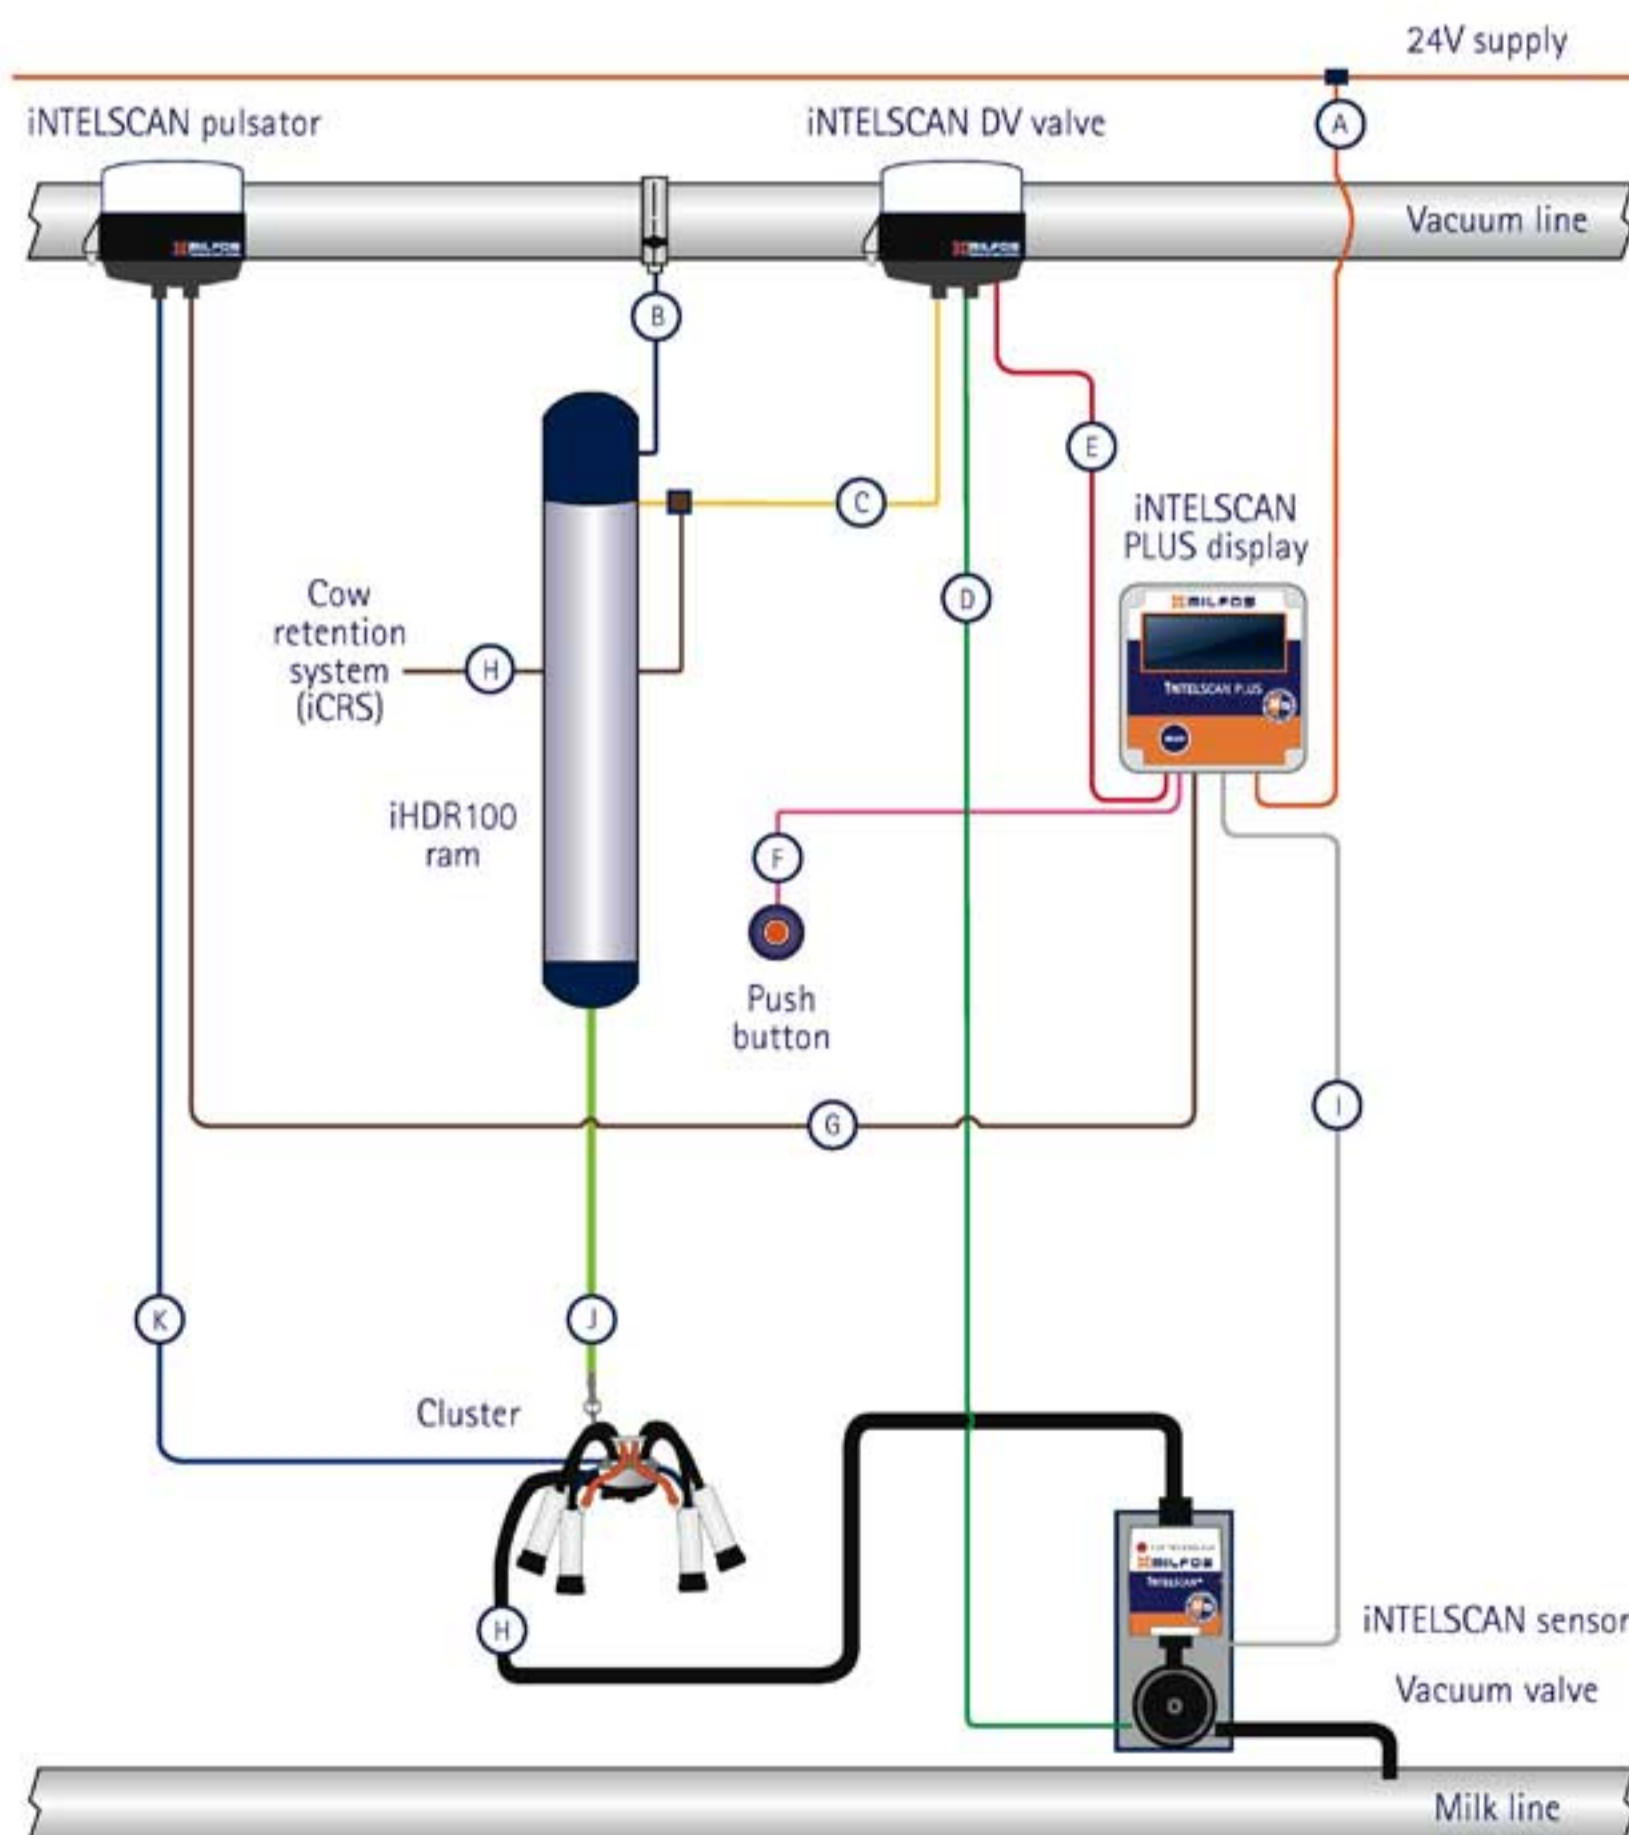

### iNTELSKAN LEVEL 4

iNTELSKAN PLUS level 4 is a comprehensive milking point management system that incorporates cluster removal ram and advanced pulsation. All features from other automation levels are supplied as standard. Special application software allows the system to be customised to your automation requirements for herringbone and rotaries. You can expand your system with Advanced Herd Management modules. When linked with iDATAFLOW cow identification, breeding and health alerts are displayed on screen.

### KEY FEATURES

- Comprehensive milking point management system
- Incorporates all features from level 1-3
- Customise to meet your automation requirements
- Expand your system with advanced herd management modules
