

# iNTELSKAN PLUS with Dataflow for Rotary

Once you have selected from levels 1-4 of iNTELSKAN Milking Point Hardware you can then select your parlour automation requirements. Data Terminals, LCD Message Screens, Sorting and Weighing options are just a few of the iDATAFLOW modules that link to your iNTELSKAN system. If you are not purchasing the full suite of automation modules we recommend that you make adequate provision for the future.

## iDATAFLOW MODULES FOR iNTELSKAN

- Select your iNTELSKAN Milking Point options 1-4 (see [7.3.10](#))
- Details on iDATAFLOW modules are included in the Automation section
- Details of suitable layouts with a guide to locating the iDATAFLOW modules are included in the Stalling and Milking sections
- iDATAFLOW and iNTELSKAN are suitable for new and existing milking parlours
- Think ahead to 'Future Proof' your operation
