

MILK PUMPING

The Milfos range of Centrifugal Milk pumps are cost effective, quiet in operation and require minimal maintenance. The Centrifugal Milk Pumps consist of a 2-pole foot and flange mounted electric motor coupled to a stainless steel pump head. All pumps utilise stainless steel impellers. The pump head is fitted with drain points to meet industry hygiene standards.

Suitable milk pump control options include the Milfos INTELPUMP (see [7.4.2](#)) or the Milfos INTELFLOW (see [7.4.4](#)).

STD MILK PUMPS

The STD Centrifugal pumps are available in 0.75kW (30 point), 1.1kW (40 point) or 1.5kW (50 point) sizes and has a four blade Stainless steel impellor, it also features an in built Stainless steel shut off valve.

MILK PUMP COVER

The Milfos Milk pump cover is designed to cover the pump and protects against water ingress and dirt whilst still providing adequate ventilation it is designed to be used with the Milk Pump universal base plate.

HD MILK PUMPS

The HD Centrifugal pumps are available in 1.5kW (54 point) or 2.2kW (70 point) sizes and features a cast Stainless steel seven blade impellor and a cast and machined head assembly.

This pump is a very robust and low maintenance option.

Note: Milk pump sizing is indicative only
