

iC275

The iC275 cluster is a well proven design with many years of use in the field. Simple but robust construction makes the iC275 an efficient and hard working claw piece.

Suitable for use with low, medium and high yielding animals the iC275 is an all-rounder. Compact size allows quick attachment of the cluster from the side or through the back legs of the cow.

Available in 4x0 or 2x2 pulsation the iC275 is a good option as a cluster upgrade for a current or new system.

The iC275 claw is protected from its harsh working environment through robust plastic mouldings with well placed protective bumpers on the claw bowl.

SPECIFICATIONS

CAPACITY	275ml
WEIGHT	550grams
MILK INLET TUBES	13mm
MILK OUTLETS	16mm or 19mm
AIR INLETS	7mm (2 x 2) and 13mm (4 x 0)
AIR OUTLETS	2 x 2 = 7mm
PULSATION OPTIONS	2 x 2 and 4 x 0
DIMENSIONS	145mmL x 102mmW x 123mmD
